

## **Michigan Operation Lifesaver Grade Crossing Collision Investigation Courses 2007**

### **Course Description:**

The classroom portion of the course is designed to enhance the safety and investigative skills of First Responders, Law Enforcement Officers responding to rail/highway crossing collisions and other railroad incidents. The course examines the various types of collisions, elements of a collision, techniques of investigation, interaction with railroad personnel, rail equipment, signalization, state and federal laws, hazards of train incidents, enforcement initiatives, and officer safety at the scene.

The field exercise portion of the course provides for hands-on training and an "Officer on the Train Enforcement" initiative in the community. The course is limited to 20 officers on a first-come basis. **THE GCCI course is MCOLES credited.** Michigan Operation Lifesaver and its rail safety partners provide the course without a course fee.
